

Description

The GEMRD Series Remote Display seamlessly extends the capabilities of the GloTech GEM Series electromagnetic flow meters. With its simple plug-and-play setup, the GEMRD delivers an intuitive user experience, making it the perfect companion for GEM installations where direct meter access is limited. Its slim, low-profile design and rugged IP67-rated enclosure allow for easy installation and reliable performance in a broad range of environments.

Note: Standard 25-foot meter-to-display cable and power/data cable are included. For custom cable lengths please contact the factory.
