

Product Overview

The P2100 series end suction centrifugal pumps sets the new standard in performance and reliability. Proudly and expertly engineered in the USA, these pumps incorporate decades of modern innovations in pump hydraulics, materials, and manufacturing techniques to achieve efficiencies as high as 90%. Its heavy duty design, combined with the highest material and quality standards, enables the P2100 to outlast all other competitors to consistently provide the best performance and value in the industry.

Key Features

- Industry leading efficiencies of up to 90% lowers operating costs and are fully compliant with new DOE energy conservation standards
- Heavy-duty, reinforced volute design for maximum strength. Double volute design on larger models
- Investment cast, precision balanced stainless steel impellers standard, providing smoother operation and improved corrosion resistance
- Back pull-out design and replaceable shaft sleeves and wear rings enable convenient and cost-effective maintenance / repair
- Key product dimensions designed to allow “drop-in” replacement of many existing pump installations

Materials of Construction		
Part Name	Material	Spec Number
Volute	Cast Iron	ASTM A48 CL30
Impeller	Cast Stainless Steel	ASTM A743 CF-8
Wear Ring	Bronze	907LF
Back Plate	Cast Iron	ASTM A48 CL30
Bracket	Cast Iron	ASTM A48 CL30
Shaft	Stainless Steel	AISI 5140
